

## **International Conference on Community-Based Coastal Resources Management**

The Maritime Institute of Malaysia (MIMA) is organising the International Conference on Coastal Resources Co-Management at the Crown Princess Hotel, from 17-19 October 2000

### **Objectives:**

The objectives of the conference are:

- To promote community-based management as an alternative resource management approach in Malaysia
- To facilitate a learning dialogue among participants concerning key issues with respect to community-based management (i.e. institutional capacity, community level organisation skills, integration of science and traditional ecological knowledge, and policy reform).
- To generate information and to learn about community-based management from case studies in developed and developing countries, and international/regional community-based management programmes.
- To enhance the capacity and networking of existing fisheries and mangrove community-based management programmes.

### **Who Should Attend?**

To conference is intended for policy makers, practitioners, social workers, environmentalists, academics, and Journalists who are involved with some aspect of community-based management of coastal resources (fisheries, coral reefs and mangroves).
